THE PROBLEM

What makes an environment ideal? Cities with high quality of life, low crime, good climate, good healthcare, low pollution all comes to mind.

GOALS

The goal of this research is to use data to find cities within the United States best suited for being the location of the new R&D office, keeping in mind the factors mentioned above.

A recommendation of neighborhood within the highest ranked cities should also be part of the final report: the neighborhood chosen should be rich in amenities for the developers to spend their free time and hard-earned pay: restaurants, cinemas, parks all come to mind.

DATA SOURCES

WIKIPEDIA

Several aspects of city climate is available in Wikipedia tables. We worked with mean temperature.
